## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because figures 8 and 9 seem to be inconsistent. Figure 8 shows a stop of a smaller diameter than the circular blade, however, figure 9 does not show the stops associated with each circular blade. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Rossetter.

The device as claimed is disclosed by Rossetter with a shank 10 having a proximal end and a distal end, a first circular blade on the outer side of 24, a second circular blade on the inner side of 24, and a gauging hyperboloid shaped stop 24 of a smaller size than the two circular blades.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2859

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rossetter.

The device as claimed is disclosed by Rossetter as stated in the rejection recited above for claims 1 and 7-13, but lacks the specific sizes of the various items claimed. Size, lacking some criticality, is not considered a patentably distinct feature and therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the device of Rossetter any desired size specifically the size claimed to make the device for a specific user.

6. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over House.

The device as claimed is substantially disclosed by House with a shank having a proximal end and a distal end, a first cutting blade at the distal end of the shank, a second cutting blade spaced inward from the distal end of the shank by a gauging segment, and first and second circular shaped stops next to the cutting blades to limit the depth of the cut, but lacks the various items claimed. Size, lacking some criticality, is not considered a patentably distinct feature and therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the device of House any desired size specifically the size claimed to make the device for a specific user.

*Allowable Subject Matter*

Art Unit: 2859

7. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claims 15-20 are allowed.
